

LISTENING THERAPY

Unlocking Your Child's Potential

Information Sheet about your Child's Video

Before we speak to you for your consultation, a video of your child can provide us with more information about how your child engages with you and about their motor skills.

The types of video clips that we would like to see are:

Clip 1. A clip of your child playing or interacting with familiar people.

Clip 2. A clip of your child moving. For example, on a swing, a slide, walking etc.

Clip 3. A clip showing us how your child is currently communicating i.e. looking, laughing, pointing and talking etc.

Clip 4: A clip of your child carrying out a behaviour that you would like us to see.

Ideally, it would be great if the clips were of a 3 - 4-minute duration.

These video clips can be sent to us via WhatsApp to the number 0868420062
